25X1

1. The laying of the two new tracks has been completed along the whole stretch of the Gdynia-Gdansk railroad line, the only exceptions being two narrow places in the towns of Sopot (Zopot) and Orlowo. The existing bridges here, 30 m. long in Sopot, and 18 m. long in Orlowo, have already been widened to 12 m., but tracks have not yet been laid. At present, the electric train runs only on the section between Sopot and Gdansk (Danzig), picking up current from the grid and not, as formerly, from batteries.
2. According to the local press, the whole line will be ready to be put into service on 1 May 1953.
